InterNetworking with routers in CISCO Packet Tracer simulator

Exp. No : 10 a
Date : 3/10/26

Aim:

To design and configure a simple internetwork using a routers in asc. Packet Tracers and test connectivity between ~~btw~~ two PC's.

Procedure:

Step 1:

Configure router 1

- Select the router and open CLI
- Press enter to start Configuring Router 1
- Type enable to activate to ~~ad~~ the privileged mode.

Step 2:

- Assign IP address to every PC in the network
- Select the PC, Go to desktop and select IP configuration and assign IP address, Default gateway subnet of PC's 192.168.10.1
- Assign the default gateway of PC as 192.168.20.1

Step 3:

- Connect FastEthernet 0 port of PC0 with fastEthernet 0/0 port of router 1 using a copper straight - through Cable

- Connect last Ethernet 0 port of PC with last Ethernet 0/1 port of router 1 using a Copper straight through cable.
